### **Long-lead items for platform installation/decommissioning and pipelay vessel *Pieter Schelte* ordered**

The Swiss-based offshore installation contractor Allseas has placed the order for the power generating plant of the platform installation / decommissioning and pipelay vessel *Pieter Schelte*.

The delivery of eight diesel engines with generators sets, providing the vessel with 95 MW total installed power, was awarded to MAN, and the delivery of the twelve thrusters was awarded to Rolls Royce.

This equipment is to be supplied by end 2009, on schedule for the targeted delivery of the completed ship by end 2010.
